

The figure is a circular plot with a large outer circle and a horizontal axis. The axis has tick marks at regular intervals. The plot contains two sets of data points: blue circles and orange circles. There are also two black squares. Two overlapping circles are drawn around the data points. The blue circles are clustered on the left side of the plot, and the orange circles are clustered on the right side. The black squares are located near the center of the plot, within the overlapping region of the two circles.
